Welcome from the President of international School in Informatics for juniors

Dear colleagues, participants, teachers and coaches!

The international school in Informatics for juniors is held online this year.

For Informatics, this is not a new collaboration solution, but of course the camp-school environment helps us all work as a team. I hope that the online form will not destroy our team spirit. To do this, I suggest that coaches and teachers will do actively cooperate in the Coaching Council of the School! And I wish students to cultivate the Olympic spirit based on the code of honor by distance working, from home, independently and responsibly participating in tours and the School Cup.

Prof. Vladimir Kiryukhin, Russia, <http://isi-junior.com/org/ioc.php>
